

Hot Degrees 2017: The Year's Major Astrological Events

The 2017 issue of *Hot Degrees, Ephemerissimo*, is lovingly dedicated to Pat White, who began this annual tradition years ago.

Here, handily summarized, you will find the dates and degrees of all the stations, eclipses and outer planet sign changes in 2017—plus any conjunctions, oppositions or squares between those planets and Mars. The bottom of this page shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto.

Page 2 shows these important astrological events in the usual arrangement by date. Note major action in August, with a solar and lunar eclipse and three planetary stations.

Page 3 arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square or oppose your chart points. Also, the column headed “45°/135°” shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2017 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart (and maybe also your progressed, solar-arc-directed and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees.

New this year on Page 4 is a 45 degree graphic ephemeris for the entire year. Look for line intersections. Because the graph is in the 45 degree modulus, you can easily see semisquares and sesquiquadrates. Note, for example, that Uranus and Neptune will run in a tight semisquare for most of the summer with Venus, Mars and Jupiter triggering the aspect at the end of September. You can even draw lines for your natal positions across the graph by using the handy 45-degree equivalency guide at the bottom of page 3. More info on using a graphic ephemeris can be found at <http://www.astralis.it/45deg.htm> in an article by Mary B. Downing, a great friend of Astrolabe and mentor of mine.

All calculations were done by the best-selling astrology program *Solar Fire 9*, available from <http://Alabe.com>.
